PROFILE

Self-taught, Determined, Passionate and hardworking individual with underlying self-motivation and experience in Mobile Application Development, Website Development and Game Development with the ability to grasp new concepts quickly and efficiently.
Founded Hv Technologies in 2017 at the age of 18 and started developing apps and games.

PROJECTS

➢ STUGENT APP

An App that helps tuition centers, schools and colleges mark and monitor their student's attendance and marks as well as Upload Assignments and Notices for their students.

➢ GAMES

Developed some interesting games in Unity3D based on my original ideas and concepts for android devices and uploaded under the name of my company Hv Technologies.

➢ OTHER APPS

Developed a Money Management App that helps in maintaining a record of expenditure and also developed some informative apps for health and learning Purposes.

➢ PROGRESSIVE WEB APPS

Developed some static and basic dynamic websites as a freelancer using React Js, Firebase, Html, CSS and jQuery and then converted them to progressive web apps for better performance and benefits of mobile app.

➢ AI/ML

- Fake Image Detection
- Handwriting recognition
- Sign language gesture recognition
- Song recommendation system
